

I am opposed to changes in the law that will create a few very large owners of broadcast media without a much larger public debate. I believe that if the general public understood this issue, they would oppose putting a few big companies in control of the media and that is why there has been so little coverage in the news channels already owned by these companies. Competition is critical to make sure that we have a diversity of voices from the media. Please put off the decision for this until there is a more informed public debate. Thank you.
